

Rohos Face Logon

Robust face recognition login

The program is designed to add authentication convenience and additional security level to the standard Windows logon procedure. It allows accessing Windows computer in an easy, fast and secure way by using any Windows compatible camera. The login of the user is performed automatically once the face has been recognized by the program.

System requirements

- Windows 2k/ XP/ Vista/ Seven (x86, x64)
- webcam
- 5 MB free hard disk space

Compatible with

Two-factor authentication:

- Face recognition + PIN code with limited attempts.
- Possibility to combine both Face recognition and USB stick for login or to use them apart.

Face login and security benefits for your PC:

- Automatic login or desktop unlock when your face is recognized.
- Self-training - helps avoiding face recognition failure.
- Multi-user support - You may register faces of several users for any user account!
- All registered face patterns are saved and poor ones may be deleted.
- Supports all Windows XP - Seven (x86, x64).
- Options: Hide Rohos Face Logon window; or Temporary stop login by face.
- Last successful face-recognition logins are saved.

- All unsuccessful face-recognition logins are also saved.
- [Unique] The option "Hide Rohos Face Logon window during login" hides the fact of program's presence keeping an intruder unaware of it.
