

Rohos Logon Key for Mac

Two-factor authentication for your Mac protection

System requirements

- Mac OS X, 10.5 or 10.6 Snow Leopard.

It turns any USB drive into a security key for your Mac. It allows secure Mac login, keychain access and desktop unlock with a USB key.

The following various devices and equipment may be used in Rohos logon software for authentication purposes:

- Any USB flash drive or iPod.
- Fingerprint and biometric USB devices
- Bluetooth enabled mobile or iPhone.
- YubiKey, UmiKey or Swekey OTP tokens.
- Touchatag device with RFID tags.

Security benefits for your Mac:

- Your Mac is protected but you don't need to enter your password manually each time you unlock your Mac or system preferences.
- Automatically lock your Mac screen when USB Key is unplugged
- Strong two-factor authentication: PIN code + USB Key
- Rohos Logon Key provides cross-platform security for Windows and Mac
- Unlocking your Mac with a USB token is fully automatic and fast!
- Regular password based login may be prohibited with "Allow logging in only by using USB Key" option.
- Unlock system keychain by using USB Key
