Rohos Logon Key

Secure two-factor authentication solution

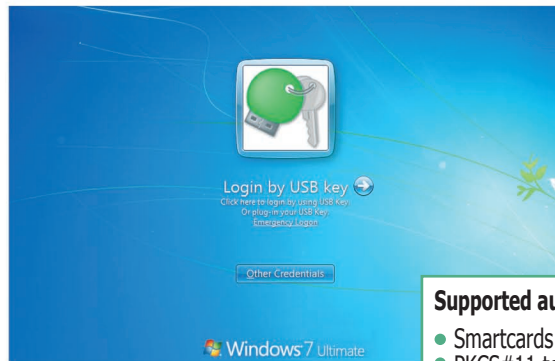

Two-factor authentication solution that converts any USB drive into a security token for your computer and allows accessing Windows in secure way by USB token, replacing the Windows login.

Provides secure login into:

- Personal computer with Windows 2000 / XP / Vista / Seven
- Windows 2000/ 2003/ 2008 Active Directory
- Novell e-Directory. Full compatibility with Novell Client 4.81 (or higher)
- Windows 2003/2008 Remote Desktop

System requirements

- 1 or more MB free space on Hard Disk
- At least 1 USB 2.0 or USB 1.1 USB port
- Internet Explorer 5.5 or higher

Supported authentication devices:

- Smartcards
- PKCS#11 tokens
- OTP tokens – YubiKey and UmiKey
- Biometrical devices
- RFID
- Bluetooth enabled devices

Key features:

- Login with a USB Key is fully automatic and fast!
- Secure 2-factor login: Your USB Key + PIN code password
- Use a single USB Key to log into your Home, laptop and office computer
- Emergency Logon that helps to access your system in case you lost USB drive or forgot PIN code
- [Unique] Protects your computer even in Windows Safe Mode login.
- Regular password based login can be disabled
- Automatic Windows lock when user withdraws USB Key from computer. And more other options...
- Rohos seamlessly integrates into any Windows configuration

Server version

Centralized USB Key Management

System requirements

- Windows XP Pro/ Windows 2003/ Windows Vista/Seven or Windows 2008 Server as your Terminal Server computer

Rohos Logon Key Server Version includes USB Key manager tools that allow setting up and manage USB tokens and Rohos Logon in corporate networks.

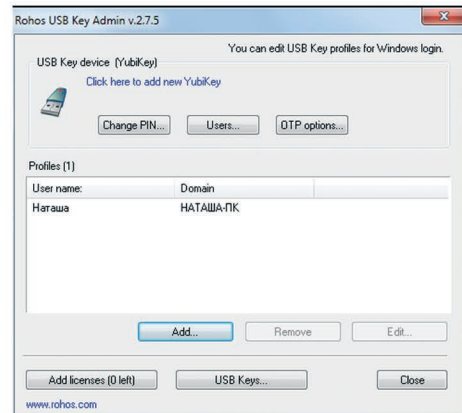

Server edition is intended for Administrator's workstation only. It has built-in USB Key Management utility (create and manage USB keys) and Rohos Remote Configuration utility (setup Rohos Logon Key settings on the computers joined to Active Directory).

Rohos USB Key Management utility.

If you have 10 or more users in your organization, you can use Rohos USB Key Admin management utility. It allows creating and editing logon profiles on USB token.

Features:

- Create USB keys for login;
- **Centralized License management.** Automatically uses license keys list to create prelicensed USB keys to simplify license management;
- **Back up/Restore operations.** Allows to Backup and restore USB Key content (logon profile);
- **PIN code security.** Set up a PIN code for USB Key protection;
- **Roaming profiles.** Create and use roaming logon profiles on a USB Key;
- **Copy/Paste operations.** Allows to copy/paste logon profiles between USB Keys;
- **Setup USB Key for Remote Desktop Login (RDP).** Copy Rohos Remote Login component into USB stick. Use this feature if you don't want to install Rohos into any computer you login from;
Setup OTP tokens (Yubikey, Umikey) and MiFare for Remote Desktop Login;

Rohos Remote Config Utility.

This Utility allows the Administrator of Active Directory changing Rohos Logon Key settings on remote workstations.

Rohos Remote Config Utility main window:

- Allows to Create the list of computers where Rohos Logon Key is installed
- Edit Rohos Logon settings on a remote computer
- Allows to edit logon profiles on a USB key connected to remote computer

Rohos Logon Key for Mac

Two-factor authentication for your Mac protection

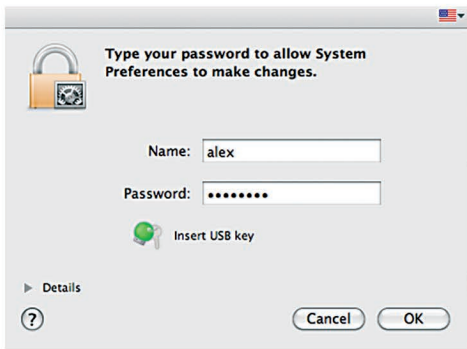

System requirements

- Mac OS X, 10.5 or 10.6 Snow Leopard.

It turns any USB drive into a security key for your Mac. It allows secure Mac login, keychain access and desktop unlock with a USB key.

The following various devices and equipment may be used in Rohos logon software for authentication purposes:

- Any USB flash drive or iPod.
- Fingerprint and biometric USB devices
- Bluetooth enabled mobile or iPhone.
- YubiKey, UmiKey or Swekey OTP tokens.
- Touchatag device with RFID tags.

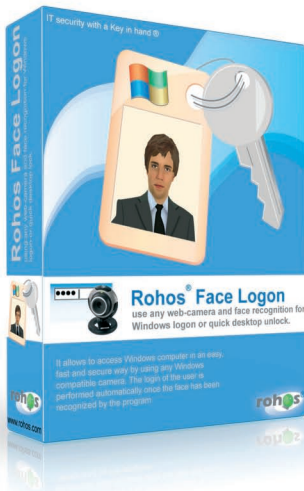

Security benefits for your Mac:

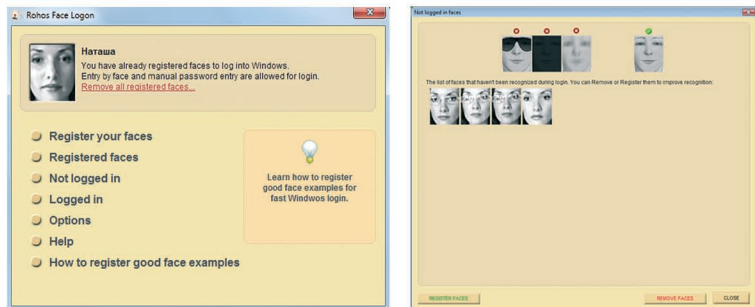

- Your Mac is protected but you don't need to enter your password manually each time you unlock your Mac or system preferences.
- Automatically lock your Mac screen when USB Key is unplugged
- Strong two-factor authentication: PIN code + USB Key
- Rohos Logon Key provides cross-platform security for Windows and Mac
- Unlocking your Mac with a USB token is fully automatic and fast!
- Regular password based login may be prohibited with "Allow logging in only by using USB Key" option.
- Unlock system keychain by using USB Key

Rohos Face Logon

Robust face recognition login

The program is designed to add authentication convenience and additional security level to the standard Windows logon procedure. It allows accessing Windows computer in an easy, fast and secure way by using any Windows compatible camera. The login of the user is performed automatically once the face has been recognized by the program.

System requirements

- Windows 2k/ XP/ Vista/ Seven (x86, x64)
- webcam
- 5 MB free hard disk space

Two-factor authentication:

- Face recognition + PIN code with limited attempts.
- Possibility to combine both Face recognition and USB stick for login or to use them apart.

Face login and security benefits for your PC:

- Automatic login or desktop unlock when your face is recognized.
- Self-training - helps avoiding face recognition failure.
- Multi-user support - You may register faces of several users for any user account!
- All registered face patterns are saved and poor ones may be deleted.
- Supports all Windows XP - Seven (x86, x64).
- Options: Hide Rohos Face Logon window; or Temporary stop login by face.
- Last successful face-recognition logins are saved.

- All unsuccessful face-recognition logins are also saved.
- [Unique] The option "Hide Rohos Face Logon window during login" hides the fact of program's presence keeping an intruder unaware of it.

Rohos Disk Encryption

Reliable HDD and USB flash drive encryption utility

System requirements

- Windows 2000 / XP / 2003 / Vista / 2008 /Seven
- USB drive with 50Mb or more free space

The program creates hidden and protected partitions on the computer or USB flash drive. Best encryption software that protects your sensitive data on internal or removable drives. It also offers “on-the-fly” encryption even in traveler mode by using portable utility - Rohos Disk Browser.

Security features:

- **Strong & on-the-fly encryption.** NIST approved AES encryption algorithm, 256 bit encryption key length is used.
 - **No risk of data loss.** Password reset option allows creating a backup file to access your secured disk if you forgot your password or lost USB key.
 - **Easy to use.** Your first Rohos Encrypted Drive can be turned on with a single click or automatically on system startup.
 - **Portable data security solution.** You can have a protected partition on your USB flash drive and access it on any computer without administrative rights.
 - **Unlimited encryption capacity.** Have unlimited number of additional encrypted virtual drives, over your network storage, USB flash drive or DVD-ROM.
 - **Have a USB Key for access control.** Use USB flash drive or security tokens to access your secured disk automatically no need to remember and type in your password.
- **Secure shortcuts on the desktop.** Shortcuts to the documents from the encrypted drive will automatically be hidden from the desktop when secured drive gets disconnected.
 - **Hide Folder & Application.** Encrypt any regular folder from your PC. Allows to encrypt and lock your internet applications like Skype, Firefox, Google Chrome etc.
 - **Integrated File-shredder.** Any file or folder can be easily and without any trace moved into Encrypted Rohos Disk with shredding afterwards.
 - **Expandable virtual drives.** You are allowed enlarging virtual encrypted partition any time you need.
 - **Steganography.** Hide your sensitive files into a single AVI movie or media file such as MP3, OGG, WMA etc.

Rohos Mini Drive

Most Wanted Free portable encryption utility

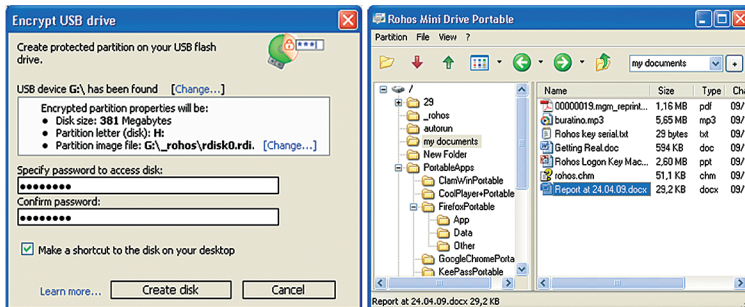

TOP RANKED
FREWARE

It's free USB flash drive encryption tool that creates hidden and password protected partition on the USB flash drive memory. This portable partition encryption tool offers "on-the-fly" encryption even in traveler mode by using utility - Rohos Mini Drive portable. Working with encrypted files on the hidden volume no longer requires Administrative rights.

System requirements

- Windows 2000 / XP / 2003 / Vista / 2008 /Seven
- USB drive with 50Mb or more free space

USB flash drive security benefits:

- Creates an encrypted partition or container on USB flash drive or portable HDD.
- Encrypted partition is protected by a password
- Encryption is automatic and on-the-fly. AES 256 bit key length. Using NIST mini compliant encryption standards.
- **Hide Folder & Application** - Encrypt any regular folder from your PC and hide it into USB drive.
- **Secured virtual keyboard** - protect encrypted disk password from a keylogger.

Rohos Mini Drive Portable:

- Works from any USB drive without installation.
- Does not require Administrative rights - opens any encrypted file without decrypting it into temp folder.
- File Virtualization - prevents secret data leak outside encrypted disk on TEMP folders, Registry, Recent documents list, etc.

Free Edition limit - 2 GB virtual disk size.

Tesline-Service SRL

Established in 2000, in 2003 Tesline-Service SRL started developing a line of Rohos products -strong two-factor authentication and secure data encryption solutions for small enterprises, educational institutions and end users. Our motto is **IT security with the Key in hand!**

Hardware and Software Vendor Partners

For software and hardware vendors Tesline-Service offers to integrate Rohos in thus enhancing their existing products with the best authentication and encryption solutions. Rohos Logon Key and Rohos Disk use internal token API and could work with practically any authentication device - PKCS#11, OATH, OTP tokens, RFID tags and readers.
